

UCLA

DEPARTMENT OF CHEMISTRY AND BIOCHEMISTRY

presents

**Chemistry-Biology Interface Special Lecture,
Special Organic Seminar,
and Chem C105/CM205A: Chemistry of Biology Lecture**

with

Professor Christopher T. Walsh

Department of Biological Chemistry and Molecular Pharmacology
Harvard Medical School

“Prospects for New Antibiotics: A Molecule-Centered Perspective”

Research. The broad area of interest of the Walsh Research Lab is the molecular basis of biological catalysis with focus on the structure and function of enzymes. Much of the current focus is on the biosynthesis and mechanism of action of antibiotics and bacterial siderophores.

Tuesday, May 6, 2014

2:00 PM

CNSI Auditorium
