

Careers in Green Chemistry

Seminar Series

CENTER FOR
INTEGRATED
CATALYSIS

As part of the Center for Integrated Catalysis we would like to welcome

Frank Cassou

Thursday, March 11, 2021
1:00 pm PST via Zoom

Frank is a founder and CEO of Cyclopure, which was formed in 2016 to commercialize novel beta-cyclodextrin polymer adsorbents for the removal of PFAS and other micropollutants from drinking water. Mr. Cassou is an entrepreneurial leader who has worked in tech throughout his career, guiding businesses through technology development and product launch. He has an extensive background in corporate finance, business strategy, product development, and IP. He wants to come back as Roger Federer in his next life.

Join us for the opportunity to hear from Frank about his unique experience and career journey that led him to help found Cyclopure
