

# Houk-Jung Organic Colloquium

## ***From Molecules to Mice: A Decade as a Bruin***

**Abstract:** The UCLA Department of Chemistry and Biochemistry is an amazing place and I am very fortunate to have launched my career here. This talk will highlight the key scientific contributions we have made over a decade at UCLA, the trainees at the heart of the discoveries, and the collaborations that have helped shape our science. Our work is very interdisciplinary— there will be something for everyone!

Prof. Ellen Sletten  
Department of Chemistry and  
Biochemistry  
University of California, Los Angeles
